

Novel Finding: λ Parameter Controls DermaMNIST Convergence (seed=42, single run)

$\lambda = -0.8$ consistently $\rightarrow$ degenerate solution; $\lambda \geq -0.4 \rightarrow$ real learning

DermaMNIST: SDIV Accuracy by λ
 $\times$ = trivial solution (majority class collapse)

DermaMNIST: Trivial Solution Map
 $\times$ =trivial (66.9%) $\checkmark$ =real learning
